

WAVE TWIN LTD V2

"New twin power"

Program: Wave Twinzer PRO

The new Wave Twin Limited edition are the same shape of all the boards 2009, thanks to the fact that it was a great success throughout the whole world, and to the fact that having three wave boards lines this year in collection allowed us to have a complete range of boards with a single, twin and tri-fin set up. The most complete range of wave boards in the market today.

The Wave Twin LTD shape features:

- The mast box position has his middle point at 135, like all windsurf boards in the range 2010 .
- Fin boxes are about 5 cm further forward compared to last year.
- Together with Maui Fin Company we have opted for a new wave twin fins design that Maui Fin developed with Levi Siver: LS Wave Twins. Moreover, fins will be slightly bigger in terms of size for every WaveTwin LTD model.

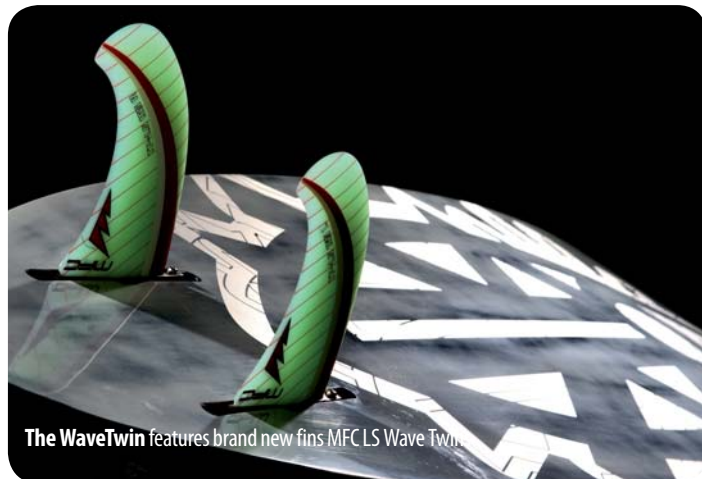

Technology:

EXCLUSIVE Custom-made full sandwich with Biaxial Glass like we had last year in our Freestyle Wave LTD lines, which give us best results in terms of weight/strength. We kept Epoxy/Herex 100 stringers on bottom of the thinnest boards (mainly 66 and 74).

Fin boxes are about 5 cm further forward

The WaveTwin features brand new fins MFC LS Wave Twin

The deck features usual comfort + technology + performance with RRD style... of course!

Fins will be slightly bigger in terms of size for every WaveTwin LTD model

The tail rail line

The mast box position now has his middle point at 135

Mod.	Size (cms)	Vol.	Weight	Fin	Sail Range
WaveTwin Ltd V2 66	232x52.5	66	5.7	MFCTP 150 G-10 CNC	3.2/4.7
WaveTwin Ltd V2 74	233x55	74	6.0	MFCTP 155 G-10 CNC	3.7/5.3
